Letter of Appreciation

Dear Sir

It gives us great pleasure to write this letter of recommendation for B Medical Systems S.a.r.l., which is the world leader in providing vaccine cold chain solutions.

B Medical Systems S.a.r.l has set up state of the art vaccine cold chain centres, which are responsible for storing and transporting each and every COVID19 vaccine that is used by the country of Luxembourg. As you know, the most important aspect is to ensure that the different vaccines are stored and transported at the recommended temperature in order to avoid any wastage of the scarce vaccines.

B Medical Systems S.a.r.l has helped ensure that each and every COVID19 vaccine that we have received from Pfizer has been stored optimally with zero temperature excursions thereby ensuring zero wastage of the vaccines. This is a great achievement especially when there is news on a daily basis about improper cold chain storage and transportation around the world.

We are pleased to write this letter of recommendation for B Medical Systems, as they have also helped us to solve any vaccine cold chain logistical issues in the true spirit of partnership; as we work together to jointly fight COVID19. We will be pleased to discuss any questions or issues that any other country faces and to help them eliminate COVID19 together from our planet.

With our best regards,

Deputy High Commissioner,

Guy BLEY

General manager Pfizer,

Reginald DECRAENE
